

		Weather: Clear		Seeing: >1"	Shane: 4082380652	Paul: 4082386047	Paul cell: 4083987526
Observers: Gibbs, Hegde, HS Students							
Frame number	Object	Filter	Exposure Time [s]	Comments			
1000-1008	flat V	V	30				
1009-1013	flat R	R	5				
1014-1016	flat B	B	120	the first one might be called flat B			
1017-1021	flat I	I	3	the counts are way too high to be Ha			
1022-	bias	na	0				
1031	sky I	I	3				
1032-33			4				
1034	sky R	R	8				
1035-36			12	light in the dome was on for all flats before this			
1037	sky V	V	20				
1038-39			30				
1040	sky B	B	30				
1041-42			60				
1043	ngc5053	V	300	focusing took a long time, and we accidentally triggered the dead man switch			
1044		B	300	the guiding was set incorrectly causing some headache			
1045		R	300	brightest stars are saturated			
1046			150				
1047	ngc4666	V	300				
1048		B					
1049		I		this image is really nice :)			
1050-51	2009 CC3	V	60				
1052-54			120	moved a little bit further along with the ephemeris - UT 6:23			
1055		I		I see it moving!			
1056-57		V					
1058-59	2013 GG69	V	120	It's really booking it			
1060-70			20				
1071	ngc6210	V	45				
1072		B					
1073		R					
1074		I					
1075-1154	wasp-2	V	80	on at UT 07:23			
				seeing was absolutely horrible initially			
1155-57	2009 CC3	V	60				
1158-60	2013 GG69	V	20
